The Wendell Johnson Speech & Hearing Clinic is offering weekly group speech therapy sessions for children from ages 7 – 17 who stutter. The clinic is located on the west side of campus at the University of Iowa in Iowa City, Iowa.

The sessions help participants:
• Explore what stuttering is, and what it is not
• Become aware of their own unique way of stuttering
• Engage in group settings with others who stutter and learn to talk openly about their speech
• Make decisions about what changes they would like to make in either speaking or stuttering, or both
• Provide opportunities for speaking in a variety of communication situations.

The group fluency therapy with graduate student clinicians are supervised by licensed speech-language pathologists. Collaboration with school-based and / or private speech-language pathologists is available and encouraged.
