Department of Geographical and Sustainability Sciences

Spring Semester
GEOG 3350(044:116)

Urban Ecology
Dr. Heather Sander

• Learn about urban ecosystems and how humans interact with other species and environmental processes in cities and towns.
• Explore this exciting new area of study and its potential to improve planning and decision making to create viable, livable, and sustainable cities.
• Fulfills requirements for Urban and Regional Planning, Geography, and Environmental Science
