ICFRC Lecture Luncheon

“Reflections on Scottish Literature, Nationalism, Referendum & Recent Elections”

Alan Riach, Ph.D.

Thursday, October 2, 2014, 12:00-1:15 pm

Congregational Church – 20 N. Clinton St.

[Register here](#), or contact (319) 335-0351 or ICFRC@uiowa.edu

The distinction of Scotland in literary identity was claimed in the 1920s by Hugh MacDiarmid as the rebuilding of political sovereignty in the country. Now, almost a hundred years later, the independence referendum focuses our attention on the relations of artistic exploration and political unrest. The relation between artistic exploration and political unrest has been apparent throughout the history of a democratic United Kingdom, in which the voting citizens of Scotland have been regularly disenfranchised. Professor Riach will discuss the relations between cultural production civic government and social discourse, and their ramifications in a dialogue of Scottish national identity

Alan Riach is Professor of Scottish Literature at the University of Glasgow in Scotland, working in the fields of 20th century Scottish, Irish, American and post-colonial literatures, modern poetry, and creative writing. His critical writings have appeared in numerous books and journals internationally. Riach was Associate Professor of English and Pro-Dean of the Faculty of Arts and Social Sciences at the University of Waikato in New Zealand. Riach studied English at the University of Cambridge as an undergraduate, and then received his PhD in Scottish Literature at the University of Glasgow.

Meeting the Renewable Energy Challenge Symposium

Main Lounge, Iowa Memorial Union

Wednesday, October 15th, 2014 12:00 PM to Thursday, October 16th, 2014 9:00 PM

This symposium takes a broad look at the scientific challenges and policy issues surrounding renewable energy, with special reference to Iowa and the Midwest. Should the government support a shift from nonrenewable to renewable sources of energy? Will shifting toward renewables decrease the pace of climate change or make us more energy secure? What are the technical barriers to rapidly increasing our reliance on renewable energy? What policy changes are necessary or desirable in order to promote renewable energy growth? Topics covered will include infrastructure development (e.g. wind farms; transmission lines), biofuels, emerging environmental problems, and distributed energy policy.

The main event will kick off with a Student Energy Expo (October 15), with opportunities for students to learn and share information about their own research related to renewable energy and related topics, followed by a renewable energy debate (October 15).

Activities will include presentations of research papers and reports, roundtable conversations, panel discussions, musical performances, book exhibits, film and documentary screenings, and more.

Otherwise, the deadline for submitting paper abstracts is **November 30**. Competitive prizes will be awarded to exceptional undergraduate and graduate student papers.
