**Ethics, Boundaries, Technology and Social Media for Social Workers**

Monday, Dec 21 · This workshop is designed to meet the requirements of social workers for 3 hours of training in ethics, boundaries, technology, and social media.

It has become clear that ethical issues related to boundaries are among the most challenging and problematic for social work practitioners. This is particularly true if there are circumstances involving dual and/or multiple relationships. This workshop will cover some of the possible conflicts and offer guidelines for risk management and avoiding ethical misconduct.

“Ethics, Boundaries, Technology and Social Media for Social Workers” is presented by Dr.
Amanda Duffy Randall, who received her BA from Michigan State University, her MSW from the University of Nebraska at Omaha (UNO), and her Ph.D. from the University of Nebraska Lincoln in Cognitive and Developmental Psychology. She is the Director of the Grace Abbott School of Social Work. She is an associate professor in the UNO School of Social Work and teaches clinical research and practice courses in the graduate program.
