The Applied Suicide Intervention Skills Training (ASIST) workshop is for caregivers who want to feel more comfortable, confident, and competent in helping to prevent the immediate risk of suicide. Over a million caregivers have received this training. Just as "CPR" skills make physical first aid possible, training in suicide intervention develops the skills needed for life assisting suicide first aid. ASIST is a two-day, intensive, interactive and practice-dominated course designed to help caregivers learn how to intervene to prevent the immediate risk of suicide and provide safety-for-now.

Training materials for this workshop were generously donated by the American Foundation for Suicide Prevention.

The Applied Suicide Intervention Skills Training (ASIST) workshop is sponsored by the School of Social Work.

8:30 am – 4:30 pm
July 13-14, 2017
Rm. 332 North Hall
Iowa City, IA
